Infrared thermometer

High Power Monitor GM89

Share:

Real 16A version of miniature power monitor products. The standard 16A national standard jack design allows you to measure the power of 16A electrical appliances without transferring any adapter plugs. A dedicated energy metering chip, combined with high-precision current sensors and LCD displays, enables comprehensive monitoring of electrical equipment.

Features Specifications Applications Accessories Download Certification sales@benetechco.com

High-Power Monitor Max16A possesses the following features:
1. Monitor the current active power value
2. Monitor current voltage/current/frequency
3. Record the total time of electricity consumption
4. Record the total electricity consumption
5. Calculate carbon dioxide emissions
6. Power factor detection
7. Load alarm threshold can be set
